WELCOME

Dear Colleagues,

After a competitive tender process in November 2015, it was announced that VWR would be the University of Oxford's preferred supplier for branded glassware.

We have jointly produced this user guide to highlight the main products included in the agreement and detail the key staff from VWR who will be supporting our aim to make purchasing branded glassware from VWR even easier.

The signed agreement brings a number of benefits to the University, including:

- The most competitive pricing available in the market
- Savings analysis
- Comprehensive customer services and technical support

You need to buy branded glassware through VWR to get the benefits outlined above. By doing so you will be helping us to achieve our objective of reducing costs wherever possible.

Best Wishes,

Chris Pugh

Professor of Renal Medicine and Chair, Science Purchasing Group, University of Oxford.

VWR and Oxford University

At VWR, we enable science. From research and teaching laboratories to clinical trials and hospitals, we can provide the products, services and solutions that make science happen at Oxford University. Our state-of-the-art, purpose built warehouse stores product stocks of around 40,000 lines, located in 17,000 m² of leading edge storage facilities. We pride ourselves on being one of the largest distribution centres of its kind in Europe!

Because of VWR's history and experience, we are able to consistently provide an unmatched product choice. From everyday products to specialised solutions, our collection of brands provides quality products at the right price. Our goal is to improve your productivity and streamline the work of scientists and other professionals through a suite of differentiated services. VWR services include custom manufacturing and support of research and laboratory operations.

Our VWR divisions enable us to offer specialist products and support to meet your requirements:

Jencons - Specialist Capital Equipment team helping you to find the best products to meet your requirements including centrifuges, ultra low temperature freezers and microscopes.

Hichrom - manufactures high quality HPLC (High Pressure Liquid Chromatography) and UHPLC (Ultra-High Pressure Liquid Chromatography) columns for the scientific community.

Basan - supplies an extensive portfolio of products and services for cleanrooms and critical environments.

PeqLab - manufactures and supplies molecular and cell biology reagents, consumables and instruments.

Lab3 Technical Services - offers tailor made maintenance agreements with a choice of service and calibration intervals for a huge range of laboratory equipment and instrumentation.

At VWR, we are committed to giving Oxford University the best range of products at the best prices.

THE VWR STOCKROOM MANAGEMENT SYSTEM

VSR+ is an easy to use Stockroom Manager, providing full management and transparency on every aspect of your stockroom products. VSR+ is a web-based warehouse and inventory management system that supports VWR products as well as third-party products from any vendor. VSR+ addresses daily situations such as low visibility of inventory, over or out-of-stock problems for critical products, time intensive ordering and replenishment of stock.

If you are interested, please contact your Account Manager who will arrange a demonstration and an initial needs analysis for you.
